

Dairy Industry Update for Service Providers and Dairy Farmers

Join key dairy industry leaders and hear the latest update from Dairy Australia, along with the results of the 2016 Dairy Farm Monitor Project. This breakfast event is an ideal opportunity to catch up with industry colleagues and to equip yourself with the most recent data and resources to benefit your clients and businesses for the year ahead.

- **Industry update from Dairy Australia**

by Ian Halliday, Managing Director, Dairy Australia

Find out the details on the dairy industry current situation and outlook for the coming year. Included will be the international market outlook, Australian market development, world supply, farm finances and milk production outlook as well as the key drivers of farm profitability.

- **DFMP (Dairy Farm Monitor Project) Results for South Australia**

by Chris Scheid, Project Officer, DFMP, SA

Learn about the latest and most comprehensive report on dairy farm financial and production data for the 2015/2016 financial year. Production and financial data is collected annually from 20 dairy farms across SA and is collated into a statewide report. Farms in the project represent a distribution of farm sizes, herd sizes and geographical locations across SA.
