

Be smart with your irrigation!

Technical Workshop

Do you know the real cost of irrigation?

Want to know how to identify irrigation in-efficiencies and save money?

Factors such as high pivot pressure, low pumping efficiency and high 'locomotion' cost (moving pivots), all contribute to unnecessary irrigation costs which can be reduced.

Presented by Nick Bullock from 'The Energy Guys', this Technical Workshop will give you the technical information required to

- save money by optimising irrigation energy requirements
- understand energy tariffs
- familiarise yourself with an audit of the energy efficiency of an irrigation system.

Nick will also summarise the results of the recent **SE Irrigation Energy Audit** project.

Joe Caruso, Major Customer Manager, SA Power Networks will be on hand to answer questions surrounding energy efficiencies.

When: Wednesday 8 March, 2017
Time: 6pm
Where: Blue Lake Golf Club – Linksvieview Bistro
RSVP: by Monday 6 March
Cost: FREE, Dinner provided
