

## Be smart with your irrigation!

### Attend the 'Smarter Irrigation' Workshop

- Do you really know when to water, and how much to apply?
- Can you afford to get it wrong?

A recent trial at Mt Compass showcased an innovative approach to operating a centre pivot on variable soils, resulting in double the industry target of DM/ML in achieving pasture productivity, and seeing pasture peak in November at 7.5 t DM/ML!

#### ***Come and hear how this was achieved!***

- ✓ Learn how soil moisture monitoring and irrigation scheduling can help you make better decisions, produce more irrigated pasture – and save money
- ✓ Presentation of actual data from this irrigation season from Clelands Dairies, Tooperang
- ✓ Be part of guiding DairySA's next step in the 'Smarter Irrigation for Profit Project'

**When:** Thursday 30 March, 2017  
**Time:** 10.30am – 3.30pm  
**Where:** The Bellum Hotel  
**Speaker:** Jeremy Nelson NR SAMDB  
**RSVP:** by Monday 27 March  
**Cost:** FREE, Lunch provided

***At 12pm - following this session - Pioneer will be holding a corn update including crop inspection at Donovan's Dairy.***
